Thanks Gary,
It would be good to see what the cameras record, if they are working. This would be the perfect time to see if barges or boats hit the pits. CAS

Hi Gary,

What an eventful night and day down here in Houston! Attached are photos I received late morning from Greg Moss. Temporary buoys are reported to be floating away. Local weatherman are calling this a 200-year flood event... as usual with heavy rain events we are all very worried about the Pits and the integrity of the cap. Keep me posted on any

9768481

developments related to this flooding event.

Also, we are all patiently awaiting an update from the dive team. Can you please provide me with an update of their findings?

Thank you!

Jackie Young
